## KEY FEATURES OF THE PROJECT

- The potential of the living lab in the region
- Stakeholders
- Objectives
- Investment opportunities
- Possible transnational cooperation for innovation

# Emilia Romagna Motor Valley

**Motor**  
**Valley**

- Heart of one of Europe's wealthiest and most dynamic regions, which is world-renowned for its production of mechanical parts, engines, sports cars as well as for its agro-food sector, ceramic tiles and manufacturing industries.
- Bologna, Ferrara, Modena and Reggio Emilia and Parma, cities with the highest quality of living standards in Italy, considered important cities of art and culture.

**UNIMORE**  
UNIVERSITÀ DEGLI STUDI DI  
MODENA E REGGIO EMILIA

- One of the best universities in Italy for teaching and research:
  - No. 1 among Italian Universities in engineering programmes in 2017 (source: Censis)
  - No. 4 among Italian Laurea Magistrale programs (Education Around 2018)
  - No. 4 among Italian large Universities, more than 20.000 students, in 2017 (source: Censis)
- Large enough to offer all the facilities one would expect from a major university
- Small enough to retain a personal and friendly environment
- 14 Departments
  - offering a wide range of degree programmes at undergraduate level, right up to doctoral studies in most disciplinary areas and research expertise and skill

# WHAT IS MASA?

MASA is a living lab created to develop, test and validate automated and connected vehicles.

## MASA IS COMPOSED BY:

**Simulator** ..... **Proving ground** ..... **Public road**

MASA consists in a public-private partnership that offers OEMs, tier 1 and tier 2 companies a complete environment to develop and validate solutions for Cooperative Connected Automated Mobility. Through its facilities,

## MASA OFFERS 3 KIND OF SERVICES:

**Advanced training**

**Research & product development**

**Support for experimental test implementation**

# MASA facilities

Autonomous Racing Competition

### F1/10 AUTONOMOUS RACING COMPETITION

1/10TH SCALE RACE CARS.  
10X THE FUN!

Learn to Build, Code, and Race self-driving cars.  
We'll walk you through the building blocks of perception,  
planning and control. Watch how international teams race  
cars with the same hardware, and outsmart each other in  
a battle of algorithms.

**JOIN US ON RACE DAY:**  
October 14, 2019  
8AM-2PM  
Carleton Commons  
S.W. Mudd Building (4th floor)

**AGENDA:**  
8-10am Practice Races  
10am-12pm Final Race  
12-1pm Hands-on tutorial on Autonomous Racing  
and how you can get involved

## AMBITIONS FOR THE FUTURE REQUEST TO:

- Regional government: Include CAM in the new transport regional plan 2025-2035; promote re-training of enrolled staff and support the motor valley touristic attraction.
- National government: Modify the Smart Road Act and allow also RTOs to test on the road their prototype. Support the creation of new degree programm on AD and NEV.
- European Commission: Provide a general legal framework and some homogenization for testing prototypes with L4 functionalities and some obligation for ADAS for trucks.
